Wet, Dry, Low or High

The System

A flexible Aluminium system that is attractively priced, offering style, elegance and outstanding in-service durability.

Featuring exclusive new designs throughout, the Chameleon Cubicle combines an array of exquisite slimline pilasters with a stylish headrail arrangement, and futuristic indicator bolts. A superior strength hinge design ensures rigidity of structure and is complemented by hidden door fixings. This attention to detail ensures that the system radiates with sophistication and quality.

“It’s Unique and Versatile”

To meet the ever increasing demands and challenges placed upon the market place, the system can be adapted to give additional privacy or increased security.

Capable of transforming into a floor to ceiling or floating cubicle arrangement, the Chameleon Cubicle offers a one stop solution to Architects and Specifiers needs.

Designed to compliment the most prestigious of executive washrooms or wet room environments, the Chameleon Cubicle can give a traditional, contemporary or ultramodern look, that can be colour co-ordinated to suit all tastes.

Fittings and Finishes

Fittings are of a “ bolt through nature” with full partition height channels supplied for increased strength and durability. Finished in a range of colour coordinated polyester powder coating colours, that are applied in accordance with ISO9001 accreditation, guaranteeing a superior product life span.

CHAMELEON™ integrated Cubicles, Lockers and Seating Systems combine exceptional strength and pure elegance with a spectrum of changeable colour combinations that allows you, like a Chameleon, “**To Create a Changing World of Your Own**”

CHAMELEON™

Cubicles

Leading The Way Through Access For All

Chameleon cubicles have been designed as a user friendly system that does not discriminate against members of society who have restricted movement or impaired vision. Chameleon actively promotes **Access For All** and aspires to ensure that a visit to a washroom is an enjoyable experience for all, not challenging one for some.

Wheelchair Accessible Cubicles

Wheelchair Accessible cubicles can easily be incorporated into the system to ensure that provisions for all are met.

Via the introduction of a sophisticated outward opening fascia section, the Chameleon inward and outward opening doors blend together to maintain a stunning uniformity and aesthetic appearance to a room.

Whilst the system, with optional grab rail products, allows for the accommodation of the latest 2004 DDA Regulations and Doc M requirements, the purposely engineered indicator bolt

surpasses present day legislation by taking into consideration the needs of the visually impaired.

On site installation and technical support

Supplied pre drilled, this ingenious system simplifies on site installation reducing attendance time by up to 30%. A full set of details complete with system specifications and installation instructions can be found in our technical support manual, fully qualified engineers are on hand to discuss your individual needs.
